Nairobi, Kenya

PROFILE

Results-driven Full-Stack Software Developer and recent BSc Information Technology graduate from Dedan Kimathi University of Technology. Experienced in designing and deploying end-to-end web applications for real-world institutional clients, with a focus on healthcare technology and social impact systems. Proficient across the full development lifecycle — from architecture and API design to production server deployment and third-party integrations.

PROJECTS & EXPERIENCE

DigiHeal-Hub — AI-Powered Healthcare Management System

2025 – 2026

DKUT Medical Center | [React](#) · [TypeScript](#) · [Node.js](#) · [PostgreSQL](#) · [Python Flask](#) · [ML](#)

- Architected and deployed a full-stack healthcare platform for DKUT Medical Center serving real patients
- Built a Python Flask ML microservice for consultation duration prediction, integrated with the main Node.js API
- Implemented role-based access control, patient records management, appointment scheduling, and billing
- Managed full production deployment including environment configuration and database migrations

Christian Biodata Management System (CBMS)

2025

Archdiocese of Nyeri | [Angular 19](#) · [Node.js](#) · [Express](#) · [MySQL](#) · [Role-Based Access Control](#)

- Delivered a production-grade sacramental records management platform for the Archdiocese of Nyeri
- Designed comprehensive database schema for sacramental data across multiple parishes
- Implemented RBAC with multiple user roles (admin, priest, data entry), document generation, and audit trails
- Wrote complete technical documentation and user manuals for handover to diocesan IT staff

Techwave Electronics — E-Commerce Platform

2025 – 2026

techwaveelectronics.co.ke | [Angular](#) · [Node.js](#) · [PostgreSQL](#) · [M-PESA Daraja API](#) · [PM2](#) · [VPS](#)

- Built and deployed a full-featured electronics e-commerce store to a live production VPS
- Integrated M-PESA Daraja API for online payments, navigating Go Live activation requirements
- Managed server administration including Node.js upgrades, Angular SSR configuration, and PM2 process management
- Resolved complex cross-origin authentication issues between Vercel frontend and Render backend

MathCode Academy — Educational Platform

2025 - 2026

[React](#) · [TypeScript](#) · [Node.js](#) | [Programming Mathematics Learning](#) | [Supabase](#)

- Developed an interactive platform for teaching programming mathematics with progress tracking and achievements
- Implemented gamification features including achievement systems and adaptive learning paths

Hostel Booking Platform

2023

[Django](#) · [HTML](#) · [CSS](#) · [JavaScript](#)

- Built a full-featured hostel booking system with user registration, login, and booking management
- Implemented automated and manual testing workflows for quality assurance

TECHNICAL SKILLS

Frontend: React, Angular 19, TypeScript, JavaScript, HTML5, CSS3

Backend: Node.js, Express.js, Python (Flask, Django), REST APIs

Databases: PostgreSQL, MySQL, MongoDB

DevOps & Tools: Git, GitHub Actions, PM2, Docker (basic), AWS (basic), Render, Vercel, VPS/Linux server admin

Integrations: M-PESA Daraja API, ML service integration, RBAC systems

Other: Agile methodology, technical documentation, system architecture, UI/UX design principles

EDUCATION

Bachelor of Science in Information Technology

2022 – 2026

Dedan Kimathi University of Technology (DKUT), Nyeri, Kenya

- Specialized in full-stack web development, database systems, and software engineering
- Member, Computer Science Club

Kenya Certificate of Secondary Education (KCSE)

2018 – 2021

High School, Kenya

INTERESTS & MOTIVATION

Passionate about technology for social impact, particularly in healthcare and humanitarian applications. Keen interest in AI/ML integration in web systems, fintech solutions, and scalable cloud-native architectures. Actively exploring opportunities with organizations building meaningful technology for African communities.
